

## Multisite Network Copy Full Post – Installation & Usage Guide

This document explains how to install, configure, and use the 'Multisite Network Copy Full Post' WordPress plugin. This plugin is designed specifically for WordPress Multisite networks.

### What This Plugin Does

- Automatically syncs posts from the main site to selected subsites
- Works only in WordPress Multisite
- Syncs posts when they are published or updated
- Allows Network Admin to choose which subsites receive synced posts
- Copies post title, content, excerpt, status, and featured image

### Requirements

- WordPress Multisite must be enabled
- Network Admin access required
- PHP 7.4 or higher recommended

### Installation Steps

1. Download the plugin ZIP file
2. Go to Network Admin → Plugins → Add New
3. Click Upload Plugin
4. Upload the ZIP file and install
5. Network Activate the plugin

### Configuration (Important)

1. Go to Network Admin → Settings → Post Sync
2. You will see a list of all subsites
3. Select the subsites where posts should be synced
4. Click Save Settings

### How Syncing Works

- Create or update a post on the main site
- When the post is published, the plugin automatically:
  - Switches to each selected subsite
  - Creates or updates the same post
  - Restores the original site context

Note: Existing synced posts are updated instead of duplicated.

### What Gets Synced

- Post title
- Post content

- Post excerpt
- Post status
- Featured image (if available)

### Limitations

- Does NOT sync custom fields or meta
- Does NOT sync taxonomies (categories/tags)
- Only works for standard posts
- Must be triggered from the main site

### Best Practices

- Always test on staging before production
- Do not bulk-edit posts during sync
- Avoid very large media files for featured images
- Keep regular database backups

### Troubleshooting

- Plugin not visible? Ensure Multisite is enabled
- Posts not syncing? Check selected subsites in Network Settings
- Media missing? Ensure uploads are enabled on subsites

## Note :-

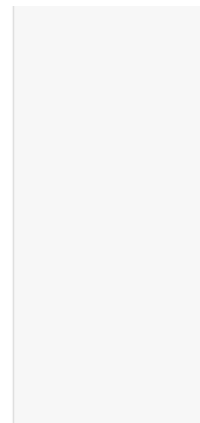

1. After purchasing a plugin from WebsBlog, you'll receive an email with the plugin file and license key.

Hi,

We have finished processing your order.

### Downloads

Product	Expires	Download
